ABSTRACTED-PUB-NO: DE 4314131A

BASIC-ABSTRACT:

Components of plants of the species Equisetum can be used to control psoriasis.

Equisetum averase and/or equisetum hiemale is used. The plants are used in the form of an aq. alcoholic extract esp. mixed with a carrier and an emulsifier.

USE - Equisetum plant components can be used in the topical treatment of psoriasis, a disease which is very difficult to treat.

ABSTRACTED-PUB-NO: DE 4314131C

EQUIVALENT-ABSTRACTS:

Use of plants of the genus Equisetum is claimed for the treatment of psoriasis. Pref. species are E. avernse and/or E. hiemale.

USE/ADVANTAGE - The treatment is for psoriasis vulgaris. The treatment has fewer disadvantages than topical treatment with corticosteroids, anthralin etc. and is more rapid than phototherapy.

EP 697878B

Use of components of Equisetum plants for topical treatment of psoriasis, burns, sun allergies, allergic contact skin disorders, dandruff, and muscle, tendon, ligament, joint and neurological pain, including gout pain and tinea unguium (fungal infection of fingernails), is new. Also claimed are: (1) use of components of Equisetum plants for topical treatment of unclean skin, pimples and acne; (2) a pharmaceutical compsn. contg. 5-45 vol.% Equisetum juice or extract in a carrier suitable for topical application; and (3) a

kit comprising a packaged combination of an Equisetum-contg. material and an anhydrous ointment.

The plants are E. arvense and/or E. hiemale. The components are in the form of a juice or aq.-alcoholic extract. The components are present in an amt. of 5-45%, or 0.1-2% in case (1). The components may be used together with lavender oil and/or extract in a vol. ratio of 90:10 to 10:90. An emulsifier may also be present.
